DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 30 is rejected under 35 U.S.C. 102(e) as being anticipated by Newbould (6874773).

Newbould discloses a multi axis chuck device having a first portion (2&6), a second portion (1), motors (4&5), a third portion (9) which are all rotatable connected.

3. Claims 1 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Oshima (2002/0180133A1).

Oshima discloses a multi axis chuck device having a first portion (7 with cutting region 10), a second portion (6), a third portion (2) which are all rotatable connected.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3723

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 31-34 and 41-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newbould (6974773) in view of Prochac (6427993).

- a. Newbould is discussed above.
- b. Newbould does not disclose scales indicating the degree of freedom.
- c. Prochac discloses a holding device having a scales indicating markings on the apparatus so the measurements can help align the workpiece or workpieces.

6. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Newbould device by providing scale indication markings as taught by Porchac so that apparatus the measures the alignment the workpiece or workpieces.

7. Claims 1, 6, 12-16, 19, 22-23, 30, and 37-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Floren (3273879) in view of Taniguchi et al (4492356).

- d. Floren a disclose rotating a multi axis chuck to various position and repositioning.
- e. Floren does not disclose a motor having a controller with a sensor.
- f. Taniguchi et al teach a method multi axis chuck having a motor (8) and controller (34) with a sensor (30) which allows for automatic positioning of the workpiece .

g. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Floren device by replacing the hand crank with a motor and controller as taught by which allows for automatic positioning of the workpiece .

8. Claims 2- 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Floren (3273879) as applied to claims 1, 6, 12-16, 19, 22-23, 30, and 37-44 above, and further in view of Prochac (6427993).

h. Floren (3273879) is discussed above.

i. Floren (3273879) does not disclose scales indicating the degree of freedom.

j. Prochac discloses a holding device having a scales indicating markings on the apparatus so the measurements can help align the workpiece or workpieces.

k. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the modified Floren (3273879) device by providing scale indication markings as taught by Porchac so that apparatus the measures the alignment the workpiece or workpieces.

Allowable Subject Matter

9. Claims 8 and 35-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

10. **Applicant's arguments filed 3/6/06 have been fully considered but they are not persuasive.**

11. **Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.**

I. New allowable subject matter has been cited in view of the new rejections. Applicant relied on the old allowable subject matter; however, applicant should now incorporate the new allowable subject matter.
